

Volker Braun in Perspective (German Monitor 58) (German Edition)

On the occasion of Volker Brauns 65th and GDR/German Monitors 25th birthday an attempt is made to re-evaluate Brauns contribution to 20th and 21st century German literature. The seventeen essays of the collection, written by a truly international set of scholars, demonstrate the unique quality and breadth of Brauns writing, spanning all literary genres. But not only that, they also reveal the diversity of interpretative perspectives which Brauns oeuvre productively stimulates. They showcase an author who refuses to indulge complacently in past achievements and an opus that defies all attempts at labelling. Brauns texts, so the verdict of the contributors, are driven by an insatiable thirst for the whole story, the depth beneath the superficial, the complex truth of our human predicament; for the precise expression which is not caught up in the limitations of the dominant ideology, whatever it might be.
